

#### Application

- Poultry Farms

### Technical Specifications

Air Flow (m <sup>3</sup> /hr) vs Static Pressure			Dimension ( External )			Dimension ( Internal )		
10Pa	20Pa	40Pa	Length (cm)	Width (cm)	High (cm)	Length (cm)	Width (cm)	High (cm)
1350	1950	2800	60	32	16	55	26	15
Packing : 4 Pieces / Cartons (61*60*34)cm								

### Benefits & Features

- Reduction of poultry diseases.
- Maintenance free and easy to operate.
- Possibility to connect to automation system.
- Significant increase in productivity and profit.
- Adjustable flap that allows fine tuning of air flow.
- Significant reduction of electricity and heating costs.
- Grid system to prevent the entry of wild animals from outside.
- Double row of stainless steel springs ensure excellent sealing and more durable.
- Made of ABS Engineering Plastic Injection Molding high Strength, high toughness.
- Main door moulded in 2 pieces preventing deformation Main door has an insulated core, preventing condensation on inside.
